

About me

I am a motivated and enthusiastic individual with a logical mind and a pragmatic approach to solving problems.

My aim is to draw inspiration from new and stimulating experiences.

I have great analytical and communication skills and a focused approach to working in a structured, but creative working environment.

Languages

English	C1
Italian	Mother Tongue
Spanish	Dele B2
French	Delf B1

Extra-personal interests

- Passionate about Football. I like to both watch it and play.
- Currently learning guitar.

Curious to learn

- Python
- Swift
- Angular
- Flutter
- React Native
- MongoDB
- web Accesibility
- Azure

Francesco Longo

Junior Full-stack developer

Work Experience

School of Code

Remote (Uk)
Oct 2022 - February 2023

Bootcamper

- **Collaboration and communication** - learned how to handle many different personalities and work styles through different pairing and team projects.
- **Learning new tools** - developed the skill to learn a new technology (eg React) in a manner of days from zero to production.
- **Front end dev** - built 20+ small web App during daily hackathons using different technologies (eg React, Js, Ts , HTML, CSS)
- **Back end dev** - built 20+ RESTful APIs following all CRUD operations using Postman to simulate Client requests.
-Build databases and table structures following architecture methodology for web applications.
- **Deployment** - Learnt different tools of deployment to deploy Full-stack App (eg Render, Heroku, Netlify)
- **Developing maintainable code** - Performed both front end and backend web based testing.
-implemented Unit test and e2e test to deliver maintainable code.

Highlights
Snapvote - One-week project: Using Agile methods, our team planned, designed and developed a multi-page React app to help people in the decision-making process.
I primarily worked on the testing implementation in our App, using React testing Library and Cypress. Contributed on styling the App using CSS.
4 weeks- project: ...

Pret à Manger

London - Liverpool (Uk)
2019 - 2022

Barista

- I had the chance to be an active part of a strong, diverse community.
- Enabled effective communication skills and team working.

Amazon warehouse

Rome (It)
2017-2019

Process Guide at Amazon warehouse

- Inbound/ outbound processing and sorting of customer packages
- Worked in teams to meet end of shift deadlines

Studies

High School Diploma in Languages

Rome - Italy
2010-2015

I studied languages in High School because I have always been fascinated by other people's background and that was a way to communicate with them better. I found interesting similarities between learning languages and programming languages and that's one of the reasons why I applied to School of Code bootcamp.
